

## Biological Permitting Specialist

Sequence is seeking an experienced Biological Permitting Specialist to work on a few of California's most dynamic projects.

The ideal individual would have at least 5 years experience permitting land development, energy, transportation and other renewable resource projects throughout the Western United States, specifically California. Candidate should possess the skills and abilities with regulatory permitting (State and Federal) for endangered species, wetlands and biological resources for CEQA and NEPA documentation projects. This will include working along side personnel from the Fish & Wildlife Services, Corps of Engineers, and other regulatory agencies for application preparation and consulting periods. Must have strong section 404, 401 knowledge.

This is a project management level opportunity in which candidates will direct a portfolio of permitting projects and personnel throughout the State.

Requires a degree in Biology, Environmental Planning or related disciplines. Master degree preferred. Excellent written and verbal communication abilities required.

For consideration, please forward resume or contact directly:
